

## ***Our Clients Get Results***

"We got Ruby from the SPCA. She was 11 months and had already been in two homes. We soon found out why...she was impossible to walk especially when any other dogs appeared on the horizon. We tried several training methods and nothing worked. We were constantly at odds with Ruby and were struggling with the decision of taking her back to the SPCA. After the first lesson with Jeff the difference was incredible. She was responding to every command and even passing by other dogs without leaving our side. "Velcro Dog!" That night Ruby slept for 12 hours straight and when she woke up we not only had a pet we had a good friend!"

**Port Moody, BC**

"Jeff is an excellent instructor. He uses proven teaching techniques to promote learning with both dogs and masters. Jeff's methods enabled our very large dog, which had come from an abusive environment, to overcome her skittish, distrustful nature and to become very obedient and self-confident within a four week period. We cannot say enough good things about Jeff and his training."

*Close to 10 million dogs are euthanized annually. Only 1/3 of all puppies live out their lives in their original homes.*

***Dogs need an Education.***

*Educating owners on how to raise and train better dogs reduces these startling numbers.*

*All About Dogs believes obedience is the key to communication. This form of canine education teaches your dog to have a mutual respect for you, something that is necessary to live in harmony with your best friend.*
